

Greenhill Glamping

A T A L K H A M C O U R T

Environmental Statement

By recycling as much as we can

We recycle newspaper, magazines, cardboard, plastic, glass and cans. We also recycle all food waste.

We use environmentally friendly cleaning products.

We produce our own electricity with photovoltaic panels

Which we use ourselves or export to the national grid.

We use LED or higher efficiency light bulbs throughout the accommodation without compromising the quality of lighting.

Taps have been fitted with water saving aerators to minimise water usage.

Sourcing local produce

We source the majority of our produce locally, and in most cases directly from the producers. This ensures quality and freshness and keeps our mileage to the minimum.

Guests staying at Greenhill Glamping – we encourage our guests to stay longer, explore our local area and use public transport. We have maps and information on local walks available for our guests to borrow during their stay.

Our wild flower meadow

The paddock next to the farmhouse has been sown with a mixture of wild flowers and grasses to encourage wildlife.

Our farm

Is part of a national environmental stewardship scheme which actively looks to increase flora, fauna and wildlife for generations to come.

Sourcing of timber

Logs are sourced where possible from our farm sustainably to keep our carbon footprint to a minimum.
